Part III DETAILED ACTION

Claims 1-17 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to method of representing polyketide structure, classified in class 703, subclass 12.
- II. Claims 7-14, drawn to database wherein polyketides are represented by string of symbols, classified in class 707, subclass 100.
- II. Claim 13, drawn to database wherein polyketides are represented by linearized representation, classified in class 707, subclass 100.
- IV. Claims 14-17, drawn to gene design, classified in class 702, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Methods I/IV are unrelated to databases of Groups II or III as the methods do not require use of databases and can be executed without the databases.

The databases II and III are patentably distinct as database of Group II does not require linearized representation required by database of Group III; conversely,

Art Unit: 1631

database of Group III does not require alphanumeric representation required by database of Group II.

Inventions I and IV are related as independent methods as they have different modes of operation, different functions, and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, and the necessity for non-coextensive literature searches restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (703) 305-4506. Dr. Borin can normally be reached between the hours of 8:30 A.M. to 5:00 P.M. EST Monday to Friday.
